

A compact **multi speed** conveyor washes up to **130 baskets per hour** and is particularly suitable for small to medium kitchens with constant workflow and soil changes. This **compact conveyor** will deliver up to **2,300 dishes per hour** with a wide range of accessories available. The Madison Series IM200 will give you the punching power of a large rack conveyor in its **unique and compact format**.

Since 1954 Norris have been manufacturing and supplying the hospitality industry with our exceptional range of commercial glass and dishwashers. In true Australian tradition, an innovative founder Vince Norris, designed and produced the first Australian commercial glass washer in his backyard shed. We are an Australian owned company and to this day all our Norris branded products are still proudly Australian made.

With our sights keenly set on the future of warewashing Norris strives to deliver more effective, more efficient machines. With all new products meeting the strictest of health and environmental standards Norris is a brand that Australia can continue to trust.

With European technology this machine has been **designed for Australian conditions** to be an **extremely user-friendly** and functional pass thru machine. Incorporating a number of **technical features** such as the smooth lifting hood, large pass-through door entry of 42cm, and a **quick start** option so when the hood closes this machine starts and **keeps performing** in the busiest of environments.

With a **specially designed** wash system the BT700 MK1 will impress in any kitchen. Without sacrificing any of the reliability the BT700 is known for the MK1 has an **abundance of power** that **ensures sparkling results**. With a minimal power and water consumption the BT700 MK1 allows you to maintain a **high standard** whilst **saving on power water** and reducing environmental impact.

The BT2000 is a **high performance** machine designed to give **powerful results** in any application. With large pumps and **rapid recovery** the BT2000 is a **workhorse**. The added advantage of a **high wash chamber** means this machine can be used for general wares as well as small pots and pans.
